# CIO AS A SERVICE

Today, many organizations, be it small, medium, or large are facing the challenge of running their core businesses and maintaining cost-effective and optimized IT infrastructure. With the rapidly changing IT landscape and the constant emergence of advanced technologies, you cannot ride on the IT curve and run your business at the same time.

We analyze and assess the maturity of your IT delivery, guide you through the planning phase of the entire service life cycle process, design and implement vendor-independent technology and solutions.

Do you need an IT infrastructure that is------>

**Secure**

**Efficient**

**Robust**

**Cost-Effective**

so you can focus more on your core business?

# CIO AS A SERVICE

**What you get:**

- IT Strategy Roadmaps
- System Selection & Integration
- Thought Leadership
- Vendor Sourcing & Procurement
- Coaching & Mentoring
- IT Governance

## Benefits for your Business:

- ✔ CIO expertise on tap, on-demand and on-site, without the price tag of a full-time CIO.
- ✔ A sounding board for strategic decision.
- ✔ Best practice methodology and approach to increase your IT's effectiveness, efficiency, and swiftness.
- ✔ Standardized IT based on industry best practice.
- ✔ Proactive Security.
- ✔ Technological Foresight and Experience.

**Get the competitive advantage that's right for your business with Sanfiity's proactive CIO-as-a-Services.**

# CRM

THE MOST AFFORDABLE FULL SUIT ERP SOLUTION

# FREIGHT FORWARDING

Our Freight Forwarding software has ultimate capabilities for handling all aspects of Supply Chain. Handle all your road, rail, ocean and air freight processes with one solution. From a request for a quote to shipments, bookings and order processing. The corresponding documentation is generated by the software.

Our cloud-based integrated freight forwarding software is capable to handle all import/export activity including financial controls in single window.

## Benefits of Freight Forwarding Software:

Great financial control and visibility

Tracking and notifications

Manage inbound and outbound freight operations easily

Use anywhere, anytime, any device

Reduce turnaround time

Align activities across departments

# Powerful Equipment Maintenance Software

## MACHINE MAINTENANCE

### Why Machine Maintenance?

Maintenance is the effort required to undertake for maintaining the equipment performance similar to new ones. Unscheduled downtime due to equipment malfunction is one of the major concerns for industries which calls for billion of dollars of losses each year. Maintenance is an important aspect to increase productivity by reducing such downtimes and improving equipment performance. The major benefits of maintenance are:

- Increase in the life of the equipment and other assets.
- Optimization of asset performance.
- Reducing unwanted downtimes, thus increased production.
- Minimizing cost.

Powerful, easy-to-use equipment maintenance software that benefits the company's management and technicians. Our Machine Maintenance system helps businesses organize track, repair, and manage assets. Our smart web application allows clients to select maintenance requests, report problems and monitor progress in real-time.

### What you get?

Intuitive and powerful tools quickly streamline any technique.

Automated preventive maintenance scheduling makes life less difficult.

Keep your entire team connected with centralized, secure and reliable data.

Detailed reporting and monitoring show areas for improvement and highlight good work.

# ONE PLATFORM FOR ALL YOUR BIDS AND TENDERS

Tendering and bidding process is a critical part of doing business for any organization. From small quotes to large-scale tenders, our unblemished solutions cover everything. Our tender management solution is expected to reduce overall operating costs through standard processes and automated approvals and increase overall revenue.
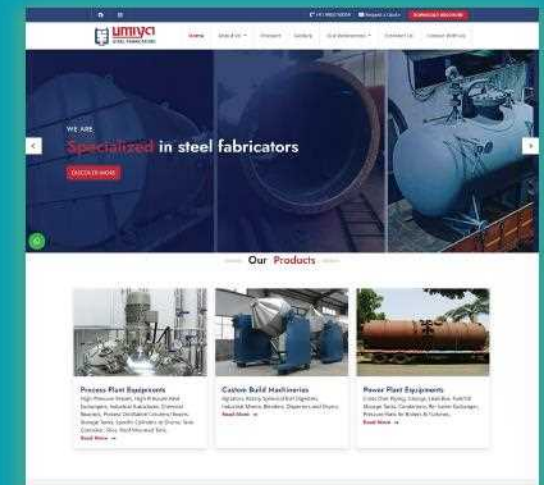

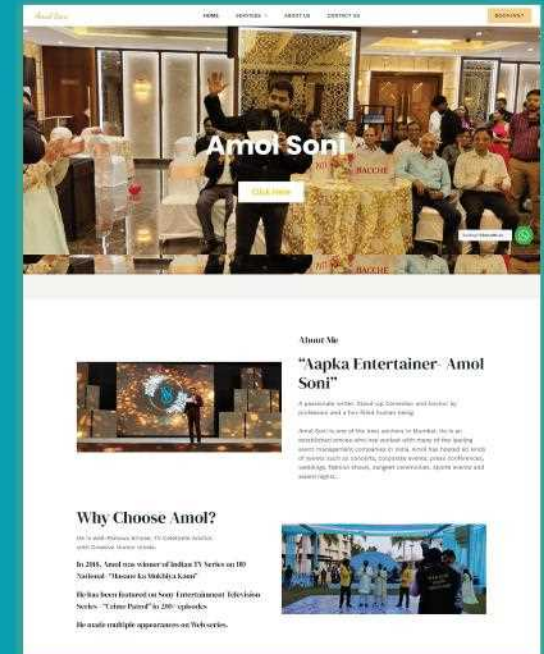

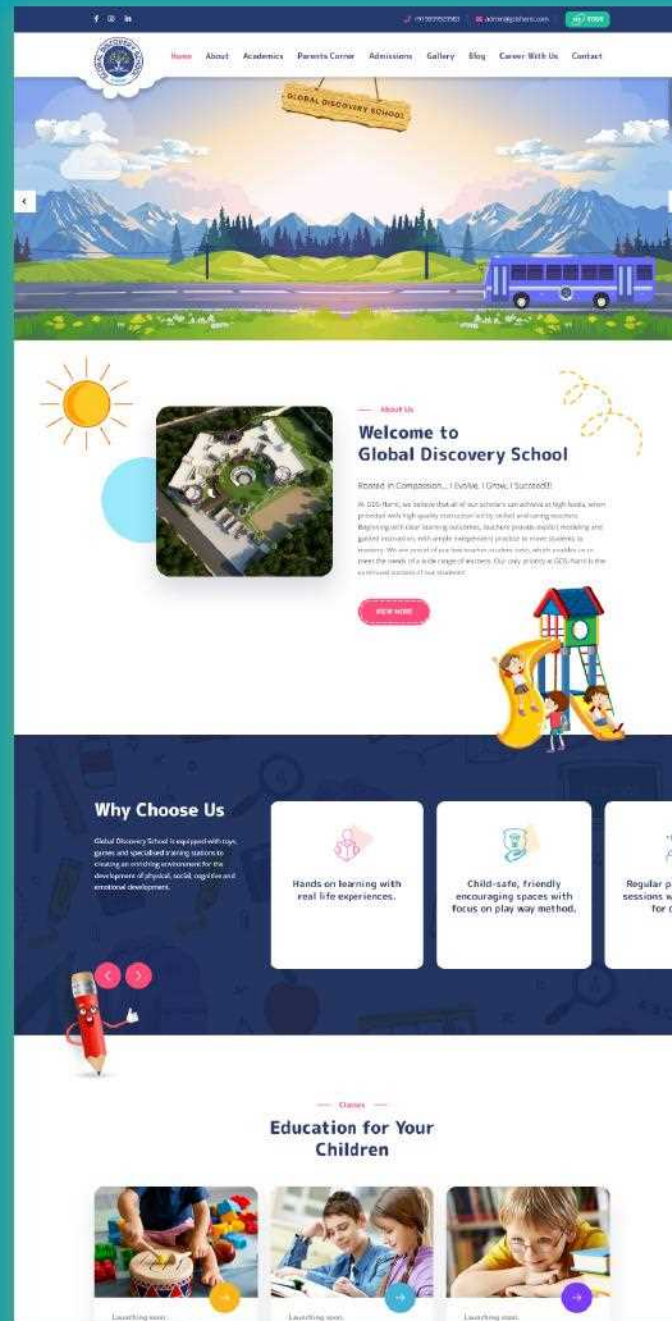

## Why you need tender management?

1. Clearly define project requirements when your team uses bid management software. This enables strategic collaboration with all contractors and stakeholders with pre-defined objectives.

2. Intelligently prepare all your tender packages for any type of business. The efficiency of the tender process increases overall business productivity.

3. Our application simplifies the grant process and highlights non-compliant bids for your convenience. Contractors associated with deals can customize the system to record and manage their contracts.

4. Industry-specific functionality cannot be guaranteed without a clear picture of where services are provided. Traditional auction management practices make tracking more difficult.

## Upgrade

to an advanced bidding and bid management solution that covers 360-degree, end-to-end processes and allows teams to select, configure, and implement current and future best practices.
